

# "We didn't know how inefficient our old guns were until we upgraded to the OptiFlex™!"

**"Now when I paint, there is hardly any powder on the ground...or on me! Great transfer efficiency!"**

**- Donald Johnson, JTEC, Inc.**

## The Company

JTEC Powder Coating Inc., family owned and operated, is located in Tilton, IL. After many years of experience in powder coating, metal finishing, and a variety of other areas, JTEC was formed in 2001 by the Davis brothers – Don, Jeff, and Joe. JTEC specializes in powder coating, along with a wide range of other business ventures; metal stripping, vinyl graphic services, custom signs on metal, custom engraving, framing and matting, and a new RC (Radio Controlled) race track. The Tilton facility consists of several curing ovens which vary in size up to 30 feet long, providing the capability of coating larger items. Approximately 104 powder coating colors are available, along with a variety of textured, high gloss, and metallic finishes. Don Davis noted "We can coat just about anything – no powder coating project is too big or too small for JTEC."

## The Results

"We were introduced to the OptiFlex unit by our local distributor, Dietz Supply Company. After the demonstration, we knew we had to have these new guns!" stated Don Davis. According to Powder Coat Room Supervisor, Donald Johnson, "I like the increased transfer efficiency and the reduced weight of the gun." The ability to control the current and voltage, the new anti-static powder hose, and the 5 year warranty were also important to JTEC in making this purchasing decision. JTEC found that the transfer efficiency of the OptiFlex was much better than their previous system, and has recognized a 20% savings in powder. "We really did not know how inefficient our previous guns were until we upgraded to the OptiFlex," stated Don Davis. For a company that is known for their quality and reliability – the OptiFlex was the right choice for JTEC!
