

WHO SHOULD ATTEND?

Operators and persons responsible for the maintenance and upkeep of ITW Gema electrostatic powder coating manual systems will benefit from this course. Companies that want their employees to learn proper and efficient manual application techniques, as well as troubleshooting and maintenance skills, should attend.

Our Teaching Philosophy

Attendees will learn how the equipment is designed to work, then how to use and maintain it. This class consists of a lecture, along with hands-on applications work in our lab.

About Your Instructors

The lecture portion of the training class is conducted by ITW Gema's A.J. Smotherman. The applications portion of the training class is led by ITW Gema's Sales Lab Manager and supported by a Lab Technician.

How to Register

Complete the attached registration form and return it to ITW Gema with your payment. Classroom and lab space is limited, so send in your registration today!

For questions, please contact **Mike Smith** at msmith@itwgema.com or **1-800-628-0648**.
